Nexa PX-900

High Performance Thermal Printer

Overview

New from Nexa, the PX-900 is a truly innovative receipt printer product. It builds on the success of previous models by including three interfaces on each printer - Serial, virtual com USB and Ethernet.

This means there is only one variation to consider, and no need for interface cards! Add to this an increased print speed to 250mm/sec, robust build quality, stylish design, and the ability to be mounted to feed the receipt out of the front of the printer or the top, it provides the features of a myriad of other printers but in just one device.

The PX-900 is also spill resistant, making it a great choice hospitality applications.

Serial, USB and Ethernet All Included

Blisteringly Fast 250mm/sec Print Speed

Spill Resistant
